This record was recorded from the background music of a video work produced by Hibiki Tokiwa. A short piece of music is included in the trailer for the photo work he created, the New Eros series. The music is made by collaging and cutting up the sounds of a number of randomly selected records. This is made by Hibiki Tokiwa himself.

This record is made by Hibiki Tokiwa himself using only one record cutting machine made as an appendix to the magazine "Otona no Kagaku".

Thanks to the creators, musicians, and artists of many famous and unknown records.
